Programming and Web: Python scripting, TypeScript, JavaScript, React, Vite, HTML, CSS

Data and Automation: PostgreSQL, SQL, Power BI, Excel, data analysis, workflow automation, report automation

Additional Skills and Tools: ChatGPT, Claude, Gemini, Perplexity, technical SEO, on-page SEO, PPC

WORK EXPERIENCE

Software Engineer - GenixCoder Technology, Nagpur

June 2025 - Present

- Developed business applications and workflow tools for vendor operations, customer data management, export processes and travel expenses.
- Built Python scripts for repetitive tasks and prompt-based applications using AI APIs, including the Anthropic Claude API.
- Used React, TypeScript and PostgreSQL in application development alongside AI-assisted coding workflows.
- Led the front-end redesign and development of the company website using Vite, including site structure and on-page SEO.
- Created and refined prompts for content generation, research and workflow automation; analyzed operational data for business insights.

PROJECTS

- **KDINK CRM Tool** - Developed a CRM application to support vendor operations, customer information and day-to-day business data management.
- **Falcon Overseas Export Desk** - Built an application to organize export-related business workflows and operational information.
- **Travel Expenses** - Developed an expense management application to organize travel-expense workflows and reduce repetitive manual processing.
- **BUSY Software Automation** - Built automation around BUSY software to simplify repetitive business processes.
- **Government Website Automation** - Developed automation for repetitive government-website workflows and process handling.
- **KDINK.ORG** - Developed a vendor-facing web solution, translating business requirements into application structure and implementation.
